

MANIFESTO

4caniperstrada is a lab of ideas, and open and committed group of artists who believes in the power of visual language as a tool for raising awareness on social issues.

Its goal is to realize educational and artistic projects to be spread in cultural, social and educational centres on a regional, national and international level.

4caniperstrada is a non-political association inspired by the principles of freedom, non-violence, peace, gender equality, human rights, anti-racism and environmental sustainability.

Its aim is to operate in favour of the production, distribution, cultural and social development of the audiovisual language, with a particular attention to "free, independent, experimental, social, documentary" arts forms.

The association produces, promotes and distributes - even in collaboration with other entities - visual and cultural projects that raise awareness on critical thinking, social enquiry, artistic experimentation, using the audiovisual media for a civic and cultural engagement.

Those are the main communication tools 4caniperstrada utilizes to create a great ideas and human lab in Sardinia, that will act as a bridge between creativity and the need for a concrete, independent and open World.
